

STATE OF CALIFORNIA
STATE WATER RESOURCES CONTROL BOARD
DIVISION OF WATER RIGHTS

SMALL DOMESTIC USE REGISTRATION

RENEWAL ORDER for CERTIFICATE NO. R263

Application 30411R of Patric R. Moore filed with the State Water Resources Control Board on November 10, 1994.

The subject appropriation meets the requirements for renewal specified in section 1228.5 of Chapter 1 of Part 2 of Division 2 of the Water Code, and is hereby renewed for the next incremental five-year period to November 9, 2004 based on the above stated date of first filing the completed registration.

The renewed appropriation is subject to the conditions of the original certificate, any previous amendments thereto, and the following amendments:

Term 11: This appropriation is subject to prior rights. Registrant may be required to curtail diversion or release water stored during the most recent collection season should diversion under this registration result in injury to holders of legal downstream senior rights. If a reservoir is involved, registrant may be required to bypass or release water through, over, or around the dam. If release of stored water would not effectively satisfy downstream prior storage rights, registrant may be required to otherwise compensate the holders of such rights for injury caused.

Term 25: This registration does not authorize any act which results in the taking of a threatened or endangered species or any act which is now prohibited, or becomes prohibited in the future, under either the California Endangered Species Act (Fish and Game Code sections 2050 to 2097) or the federal Endangered Species Act (16 U.S.C.A. sections 1531 to 1544). If a "taking" will result from any act authorized under this water right, the registrant shall obtain an incidental take permit prior to construction or operation. Registrant shall be responsible for meeting all requirements of the applicable Endangered Species Act for the project authorized under this registration.

Term 26: In the event that water is to be collected to storage under this registration, the Registrant shall install and maintain an outlet pipe of adequate size and capacity through the dam, as near as practicable to the bottom of the natural stream channel so that water that is not authorized for collection to storage can be bypassed through the dam. In the event that the dam is already constructed, registrant shall provide other means satisfactory to the Chief of the Division of Water Rights for bypassing water. Before storing water in the reservoir, registrant shall provide evidence that substantiates that the outlet pipe or other means of bypassing water has been installed. Evidence shall include photographs showing the completed works or a certification by a registered engineer. The facilities shall be maintained and operated to ensure compliance with the terms of this registration.
